DAFFODILS and NARCISSI

offered by

WALTZ BROTHERS

Mail Address: P.O. Box 209, Roanoke, Va.

Gardens at 215 Clinton St., Williamson Rd., Roanoke, Virginia

that the man the magnetic was to make the work against the

We herewith present a select list of Daffodils and Narcissi, for the season of 1948. In addition to those of our own growing, we are offering a large number of rare new varieties from the well-known Oregon Bulb Farms, — who market their bulbs at whole-sale only, — thru Dealers and Growers, like ourselves.

This List was intended primarily as a check-list for use at our exhibits at the Daffodil Shows, but by the addition of short decriptions the relative blooming season (1 being the earliest, and 6 the latest), etc., it should not be too difficult to make your selection. E after a variety denotes that it is recommended for exhibiting and G that the variety is excellent for garden use, — borders, clumps, etc., and for cutting. The asterisks (****) give the rating, — in our opinion, — of the variety, the more asterisks the better the variety. If you want something better than ordinary, which will be satisfactory in every way, and yet not too high in price, you will be more than pleased with any of the varieties with their names in larger type (DICK WELLBAND).

If you would like us to make a selection for you, of early, mid-season and late varieties, in the different types, you will find two Collections, with Special Prices, at the end of the list.

PLEASE ORDER EARLY: we will appreciate it if you will give us your order as soon as possible, so that we may know how many bulbs to dig, and also that we may send our order in early to the Oregon Bulb Farms, for the bulbs that are to come from there, and thus be assured of getting the desired varieties.

EXTRA BULBS: as a special inducement for ordering early, we are offering extra bulbs (of our selection), equal in value to for the bulbs will be included, if your order with remittance of at least 25% of the amount, is received on or (preferably) before May 15th. These will be selected from the better varieties, but naturally will have to be those of which we have fair sized stocks, — not ones of which we have only a few.

ABOUT PRICES: it is difficult to know what pric

ABOUT PRICES: it is difficult to know what prices to set for the different varieties, so early in the season; if we should find later that ours are out of line with those prevailing elsewhere, we will put in enough extra bulbs to make up any difference, — in addition to the 20% offered above.

ALL BULBS offered in this list are American grown, — Virginia, or Oregon. They are large blooming size bulbs, mostly double-nosed, and are healthy and true to name.

DELIVERY WILL be made at planting time, in September or early October, by P. Post or Express, depending on circumstances. (If you live in Roanoke, we will deliver them personally.)

If you wish, you may send only 25% of the amount with your order, and the balance when notified they are ready for shipment, All bulbs are priced singly, one dozen may be had for the price of 10; 100 for the price of 70.

I. TRUMPET VARIETIES

1-+4-116-

The Trumpet varieties are the largest of the Daffodils, — in fact, it is them that we generally think of when we hear the word Daffodil. The trumpet is long, — as long as, or longer than the perianth segments (petals), and ranges in the different varieties, from rather narrow to very wide; some are fluted and frilled, some serrated, some with the rim rolled back, etc., etc. As to color, those marked 1a, are all yellow, both trumpet and petals; the 1b's are white, —the petals white and the trumpet white, or nearly so (sometimes very pale lemon, or cream); and the 1c's are Bi-colors, — the petals white, and the trumpets various shades of yellow.

II. INCOMPARABILIS

The varieties in this group all have medium length crowns, from one-third to nearly the length of the petals. The name Incomparabilis comes from an early English vaariety of this type. In color, they are all yellow, or the petals may be yellow, and the crown wholly or partly orange, or orange-red, —these are marked 2a below. The 2b's have white petals, and cups or crowns of rich yellow, orange-red or deep red, even; in some of them the entire cup is this color, in others, there is a band of it around the edge.

	2a VELLOW POPPY (3) G** Primrose: shallow vellow cup	1

III. BARRII
This type is named after Peter Barr, an early English grower, collector and enthusiact. The group is composed of flat cupped varieties, — those with the cup or crown less than one-third the length of the petals. As to color, they have petals of yellow (3a), or white (3b), with cups of yellow, orange, orange.
red or red, as noted.

3b Volturno EG*** White; yellow crown, banded orange-red 12.50 IV. LEEDSII
This type is named after another early English hybridist and enthusiast, Edward Lee's, of Manchester. In this group the color, rather than the form, is the distinguishing characteristic.
All are predominantly white, the perianths (petals) are white, or nearly so; and the crowns white, cream, or pale citron, some-
times tinged with pink or apricet. As to form, or size, they are Giant Leedsii (4a), — with crowns from one-third to nearly the
length of the petals (similar to the Incomparabilis in form); and short-crowned Leedsii (4b).—the cups being less than one-third
the length of the petal (similar to the Barrii, in form). 4b Alberni Beauty

Valencia (4) EG*** Rich yellow and orange

COLLECTIONS

If you are not acquainted with the various varieties, and would like us to make a selection for you, we are certain that you will be pleased with either of the following collections. In both, most of the types are included, in early, mid-season and late varieties.

GARDEN COLLECTION: varieties especially good for cutting, for borders, clumps among the shrubbery, and general garden decoration; all good growers, free-blooming and satisfactory in every way. Six (6) each of Mrs. E. H. Krelage, Olympia (Trumpets); Golden Frilled, Anna Croft, Milford Haven (Incomp.); Brightling, Nobility (Barrii); Crystal Queen, Hera, Her Grace (Leedsii); Thalia (Triandrus); February Gold (Cyclamineus); (Leedsii); Thalia (Triandrus); February Gold (Cyclamineus); Golden Scepter, Jonquilla Simplex, Buttercup (Jonquils); La Fiancee, Cheerfulness (Poetaz Hybrids); White Standard (Poeticus); Twink, and Hollands Glory (Doubles); - a \$20.95 (or more)

value, for 18.50; three (3) of each for 9.75. FLOWER SHOW COLLECTION: these are still better varieties, yet reasonably priced, - which should win Blue Ribbons for you at your Daffodil and Spring Flower Shows. They are also outstanding in the garden, - if you want something better than the "other fellow" has, order this collection. Two (2) each of Silvanite (Trumpet); and Therapia (Barrii); and six (6) each of Diotima Roxane (Trumpets); Fortune, Damson, Dick Wellband (Incomp.); Tredore (Barrii); Tunis, Daisy Schaffer, Silver Salver (Leedsii); Trevithian, Golden Perfection (Jonquil Hybrids); Red Guard, Geranium (Poetaz Hybrids); Actaea (Poeticus); Insulinde, and Mary Copeland (Doubles), —a \$33.20 (or more) value, for \$29.50; one (1) each of Silvanite and Therapia, and three (3) each of the others, for \$15.50.

CULTURAL NOTES

With a few exceptions, Daffodils and Narcissi are perfectly dy, and may be grown in every section of this country, exhardy

cept Florida.
They are They are one of the first flowers to bloom in the Spring, and continue to bloom year after year, giving an ever increasing wealth of bloom. By a careful selection of varieties, you may have them in bloom over a period of nearly two months (most of March and April, here in Virginia).

They are splendid for naturalizing in meadows on hillsides, and they are splendid for naturalizing in meadows on hillsides.

meadows on hillsides, nick); for rock gardens, or in woodland (if the trees are not too thick); for rock gardens, for borders along walks, clumps in front of shrubbery, etc. As cut flowers they are unexcelled, lasting nearly a week in water, and the delightful fragrance, of the Narcissi especially, adds to and the delightful their desirability.

their desirability.

Daffodils, etc., prefer a sandy loam, but will do well in any good garden soil, provided that it is well drained. They should be planted in time to make a good root growth before the ground freezes, — in the North in September, and farther South, in October. The bulbs should be set from 4 to 6 in. deep (or even 8 in., for naturalizing), depending on the size of the bulbs and the character of the soil. Large bulbs should be planted deeper than small ones, and whatever size you are planting should be deeper in sandy soil than in heavy soil. Distances given are to the base of the bulb, not the top. If the soil is fertile no fertilizer is required, if just average, bone-meal is good at planting time; if available, strawy manure makes a good mulch for them; a light top-dressing of a good garden fertilizer (preferably organic), early in the spring, is also helpful.

They should not be planted in lawns, or any place where the

available, strawy maintre makes a good mutch for them, a light top-dressing of a good garden fertilizer (preferably organic), early in the spring, is also helpful.

They should not be planted in lawns, or any place where the foliage will be cut off before it ripens, as this will weaken the bulbs. If you like foliage to use with the flowers when you cut them, have a few clumps of some old varieties which you have plenty of, especially for this purpose.

Many red-cupped varietie (Incomp. and Barrii), and those with pink, buff and apricot tones (Leedsii) are not at their best when allowed to open in the full sun, especially in a warm dry season. They should have partial shade, and plenty of moist-ure; if this cannot be provided in the garden, they should be cut (especially for exhibiting) as soon as they start to open, and placed in water in a cool dark room.

The bulbs need not be moved more often than every 3 or 4 year, — when they begin to get too thick; but may be taken up and replanted sooner, if desired. They should be dug soon after the tops begin to turn yellow, stored in a cool dry place over summer, and then replanted in Sept. or Oct. The bulbs should be separated, but do not break them apart unless they come easily.

come easily.
